

GENESIS®

CaCO₃ CLEANER

Used for cleaning of dampening systems, transfer cylinders, impression cylinders and as a fountain solution additive. Genesis® CaCO₃ Cleaner is also used as a final rinse on ink rollers to remove unwanted calcium deposits.

When used as a fountain solution additive, blankets will remain cleaner with less "white" buildup and pH is stabilized which extends the life of the fountain solution.

USE: CaCO₃ Cleaner is designed for use as packaged. When added to the fountain solution water mixture, this product will prevent and stabilize pH drift. Blankets will also remain cleaner with less "white" build-up. (add 1/2 -3 1/2 oz per gallon of mixed fountain solution in water) When added to blanket and impression cylinder cleaners, cylinder cleaning is fast and complete. (add to solvent rag) This product is also used as a final rinse before water, when cleaning the ink train rollers. (with wash up blades on, use this product after solvent cleaning, followed by a clean water rinse out)

VOC METHOD 24: 0.17 lbs. per US gallon

Genesis® CaCO₃ Cleaner does not contain any reportable level of SARA Title 313 or HAPS Chemicals.

FEATURE	BENEFIT
 As an additive Genesis® CaCO ₃ Cleaner limits the amount of unwanted calcium on blankets and rollers	 Fewer problems with paper dust and stripping
 Most effective calcium rinse	 Eliminates stripping issues caused by calcium buildup
 Low VOC	 Reduction in reporting
 No regulated toxins	 Improved employee and community safety
