

Silicone Proportioning System

Key Benefits

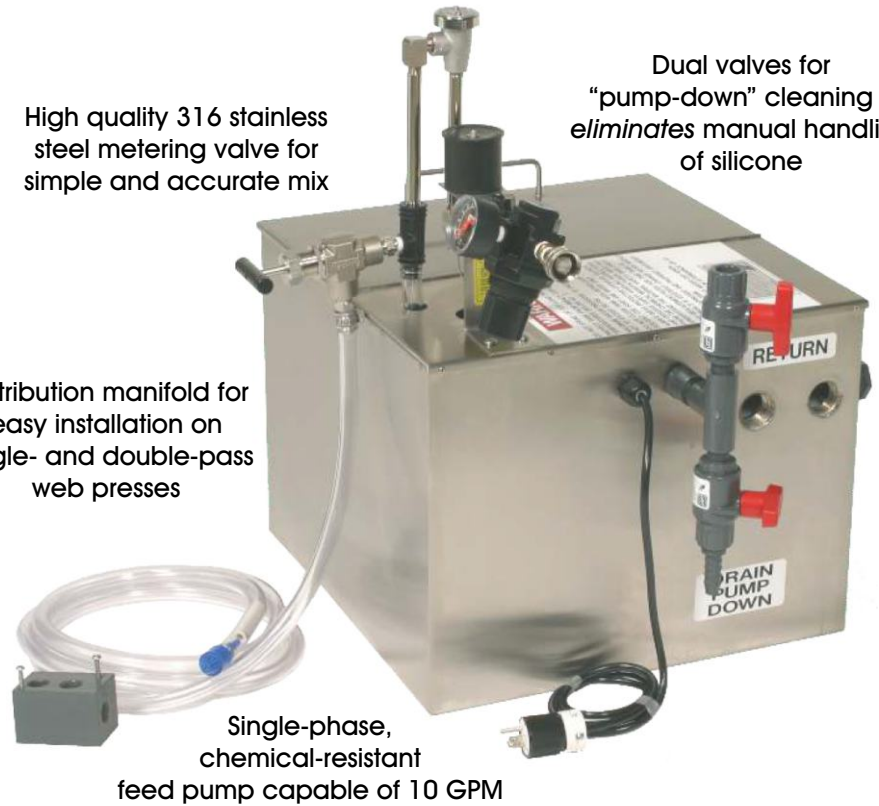

Users report...

- 30 % reduction in silicon use
- Reduced cleanup time
- Reduced mixing errors
- Improved consistency

High quality 316 stainless steel metering valve for simple and accurate mix

Dual valves for "pump-down" cleaning – eliminates manual handling of silicone

Distribution manifold for easy installation on single- and double-pass web presses

Single-phase, chemical-resistant feed pump capable of 10 GPM

Water pressure activated proportioning pump needs no electricity and delivers any mixture ratio

Water pressure regulator assures accuracy and consistency

Durable 316 stainless steel construction assures years of trouble-free service

Silicone return is filtered via inexpensive filter

Silicone Proportioning System

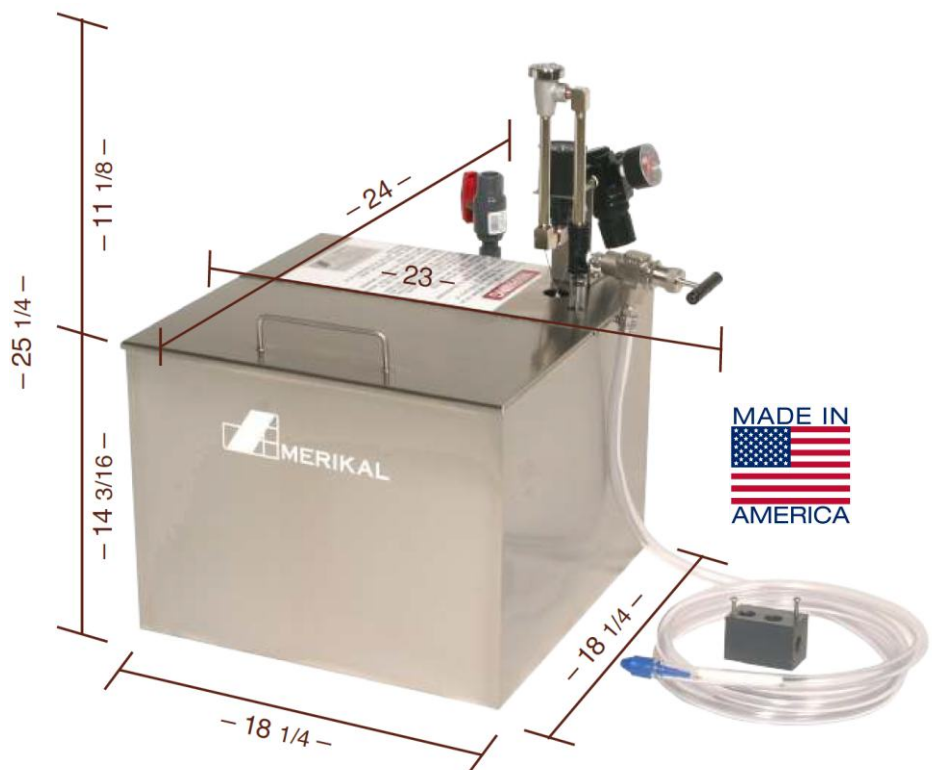

Exceptional Design

Exceptional Quality

Exceptional Simplicity

Features And Benefits

- Tank and lid constructed of 316 stainless steel for durability and ease-of-cleaning
- Silicone returns through inexpensive polyester-lofted-pad filter mounted in stainless steel basket – *change filter in seconds*
- Silicone proportion is easy-to-set and supports mixing small quantities (approx 3-4 U.S. gallons) – mix fresh product on-demand throughout the day *leaving press pans and drain lines clean*
- 10-30% reduction in silicone use – less clean up time, fewer mixing errors, increased consistency
- Six month parts-and-labor warranty
